sophistication for any setting

The Fusion Buffet System is a unique and versatile solution for your foodservice presentation. With multi-sized risers, juicers, and baskets, you can mix and match your display with the numerous wood & metal finishes available. Designed from reclaimed wood, the teak products are environmentally friendly and cost effective, while its natural properties make it resistant to heat, light and moisture. Resin, tempered glass or teak wood tiles can also be used to add new heights, while the 14" risers can be outfitted with universal inserts that make cooking and heating easier.

servicing up cultural food trends

While hot pots have been an essential part of the Chinese dining culture for centuries, this unique concept has become a fast-growing restaurant food trend and we have two great options to accommodate. Our large hot pot is divided into 2-quart sections, allowing for two different broths to be simmering in the same vessel, making this a versatile option for diners who enjoy variety. While the small 1.6 quart hot pot is the perfect size for a small tabletop, and both sizes can be used with optional heat element bases or on induction cooking surfaces.

chafing dishes at a phenomenal price point

We are pleased to bring hydraulic closing chafing dishes to the Creations collection. Each chafer has a convenient large glass view in the cover in order to increase visibility of the food while minimising the times the lid is opened, therefore keeping the heat in and the food at proper serving temperature. Additionally, the easy-to-remove hydraulic lid closes on its own to ensure that food is kept safe and covered during service. Great for any buffet display, these chafers are induction capable and perfectly priced for even the most value-conscious operators.
